

Environmental Policy

At Ascent Training our workplace is the outdoor/underground environment, though some time is spent in our conventional office.

The outdoor environment has a huge amount to offer. It's a great setting for adventure, fun, learning and personal development. In our outdoor adventures our staff appreciate and respect the environment and we encourage our students to do the same. We strive to be as environmentally responsible in our enjoyment of the outdoors. We want you to experience with us this amazing environment and to have as little impact as possible. Our aim is to leave nothing more than our footprints behind when we go home.

Car Sharing & Recycling

We would like to facilitate car sharing where possible. Let us know where you're coming from and we may be able to coordinate with other course participants to save a car journey. Participants on Apex Training's (our sister company) ML and SPA courses can log in and the forum allows course members to advertise lift sharing.

The indoor office

Envelopes and paper we use are from recycled materials and paper, cardboard and plastic is also recycled.
