

Intermediate Rock (5 days)

This course is designed for those with some experience of rock climbing who wish to improve their rope skills, climbing ability and possibly learn to lead.

You may have spent a winter in a wall, experienced real rock and want to know more. You may have been climbing for some time but self taught and would like to know some safer methods of climbing.

Under excellent instruction and a high student staff ratio we will focus on the needs of the students and spend lots of time climbing.
